Exam : 310-876

Title : LEVEL2 SYSTEM SUPPORT
ENGINEER EXAMINATION

Vendors : SUN

Version : DEMO

NO.1 Which is a main advantage of a concatenated virtual file system?

- A. Data segments are written in parallel.
- B. The file system can be increased while it is mounted and in use.
- C. Each physical disk must be attached to a different system interface.
- D. The file system can utilize more disk space than is physically available.

Answer: B

NO.2 How does Solstice DiskSuite assemble large volumes from multiple disk drives?

- A. Disks are formatted into two slices and utilizes contiguous sectors.
- B. It forces the use of all available partitions and stripes across them.
- C. It creates and joins virtual volumes that are larger than one physical disk.
- D. It uses standard partitioned disk slices that have been created using the format utility.

Answer: D

NO.3 What is the purpose of the Boot Server field in the Host Manager interface?

- A. It is used to manage all name services on a network.
- B. It is a predefined host selected as the Operating System (OS) server.
- C. It is used to manage all name services on a network.
- D. It is typically used when configuring a JumpStart server.

Answer: D

NO.4 Which swap command can be used to add a swap file /export/swapfile to the system's swap space?

- A. swap -a /export/swapfile
- B. swap -d /export/swapfile
- C. swap -l /export/swapfile
- D. swap -s /export/swapfile

Answer: A

NO.5 The results of the Solaris installation can be found in which file?

- A. /var/sadm/pkg
- B. /var/adm/messages
- C. /var/sadm/softinfo
- D. /var/sadm/install_data/install_log

Answer: D

NO.6 What is the Minimum local disk space required for a diskless client workstation configuration?

- A. 0 Mbytes
- B. 55 Mbytes
- C. 100 Mbytes
- D. 1024 Mbytes

Answer: A

NO.7 What file do you edit to allow root access from a remote system?

- A. /etc/default
- B. etc/host.allow
- C. etc/default/login
- D. etc/default/login/remote

Answer: C

NO.8 Which type of modem requires a Data Carrier Detect signal?

- A. Null Modem
- B. Single-duplex Modem
- C. Bi-directional Modem
- D. Mono-directional Modem

Answer: C

NO.9 Which is NOT required by an AutoClient workstation?

- A. /opt
- B. /usr
- C. swap
- D. root (/)

Answer: A

NO.10 Which is NOT true regarding striped volumes?

- A. Data segments can be written in parallel.
- B. Striped Volumes result in performance improvement.
- C. Each physical disk MUST attach to the same system I/O interface.
- D. The segment size (stripe size) can be adjusted to optimize performance.

Answer: C

NO.11 What is the MAXIMUM size limitation for a file system?

- A. It cannot exceed 512k in size.
- B. It cannot exceed 1024k in size.
- C. It cannot exceed 1 TByte in size.

D. It is unlimited in size.

Answer: C

NO.12 What is the function of the Domain Name Service (DNS)?

A. It is used within a TCP/IP network to translate host names to their associated IP addressed.

B. It stores information about workstation names and addresses, users, the network itself, and network services.

C. It provides a forwarding service that forwards host lookups to NIS if the information cannot be found in a DNS map.

D. It makes network administration more manageable by providing centralized control over a variety of network information.

Answer: A

NO.13 What is the size of the configuration cluster "Developer System Support" (64-bit support)?

A. 272 Mbytes

B. 438 Mbytes

C. 532 Mbytes

D. 837 Mbytes

Answer: D

NO.14 Identify the three components of installation software.

A. Patches, Packages, Software Clusters

B. Software Clusters, Patches, Packages

C. Configuration clusters, Patches, Software Clusters

D. Packages, Software clusters, Configuration Clusters

Answer: D
