Professional Study Tool and Reliable Exam Practice Material

Exam : **C9560-507**

Title : **IBM Tivoli Monitoring V6.3
Implementation**

Vendor : **IBM**

Version : **DEMO**

NO.1 What must occur before installing the IBM Tivoli Monitoring Portal Server on a Microsoft Windows-based system?

- A. The user ID can be any non-administrative ID.
- B. The user ID must be a local ID with administrator privileges.
- C. The user ID must not already exist and be created by the Install Shield.
- D. The user ID must be a domain ID with only database administrator privileges.

Answer: B

NO.2 Which statement is true regarding Agent Builder?

- A. It only runs on Windows.
- B. It must be installed on a server where an OS agent is installed.
- C. It can be installed in a separate directory from other IBM Tivoli Monitoring components.
- D. It must be installed on the same server as Tivoli Enterprise Portal Server or Tivoli Enterprise Monitoring Server.

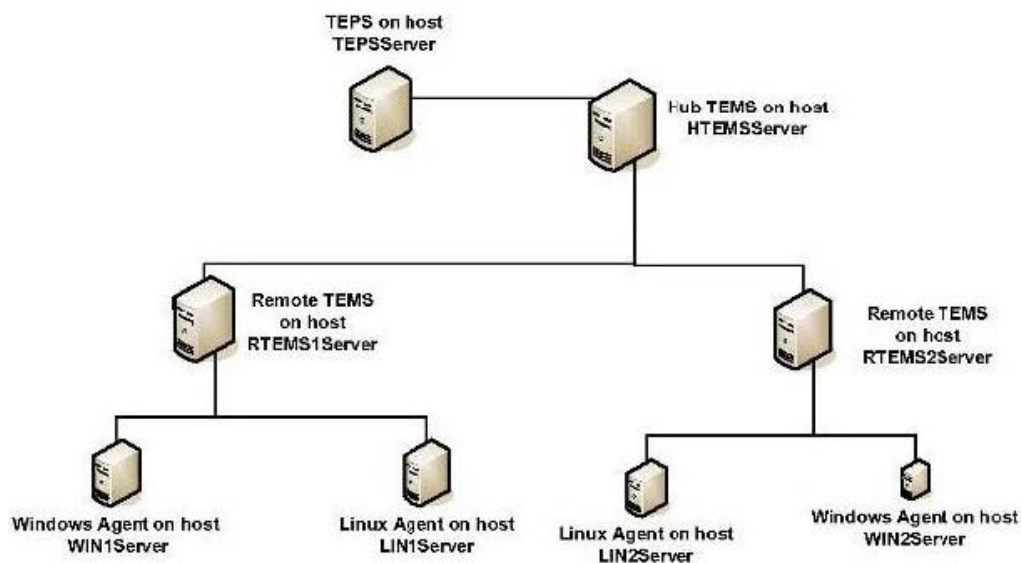

Answer: C

NO.3 What occurs if multiple collections are configured for the same attribute group and are distributed to the same Managed System?

- A. The data is only collected once by the last distribution.
- B. The data is only collected once by the first distribution.
- C. The data is collected multiple times and summarization will be skewed.
- D. The data is collected multiple times but does not impact summarization.

Answer: C

NO.4 Click the Exhibit button.

Based on the topology, if a situation becomes true on the WIN2Server then a Take Action command could execute at which two possible locations? (Choose two.)

- A. WIN2Server

- B. TEPSServer
- C. HTEMSServer
- D. RTEMS1Server
- E. RTEMS2Server

Answer: A,E

NO.5 Which Product Code is used by default for a new agent in IBM Tivoli Monitoring Agent Builder?

- A. KP3
- B. KT6
- C. K00
- D. KAB

Answer: C

NO.6 Which two statements are true about the firewall gateway feature? (Choose two.)

- A. All ports used by gateway instances are configurable.
- B. Multiple firewall zones are not supported by this feature.
- C. All ports used by the gateway instances are not configurable.
- D. Gateway instances interoperate over a single physical relay connection.
- E. Network Address Translation (NAT) is the only reason for using this feature.

Answer: A,D

NO.7 Which two protocols can be specified when configuring a Tivoli Enterprise Monitoring Agent (TEMA) to communicate across a firewall to a Tivoli Enterprise Monitoring Server (TEMS)? (Choose two.)

- A. ICMP
- B. HTTP
- C. HTTP/S
- D. IP.PIPE
- E. IP.SPIPE

Answer: D,E

NO.8 Which statement is true given Sun or IBM JRE is not installed on a Windows system and a user with Windows administrator privileges needs to connect to the Tivoli Enterprise Portal Server using a web browser?

- A. Before attempting to connect, the user must manually download and install the IBM JRE.
- B. Before attempting to connect, the user must manually download and install the SUN JRE.
- C. When attempting to connect, the IBM JRE will be downloaded and installed automatically.
- D. When attempting to connect, the SUN JRE will be downloaded and installed automatically.

Answer: C

NO.9 A customer wants fully autonomous monitoring for their operating systems which are based in a place with these restrictions:

- image transmission bandwidth is in short supply
- disk space on the systems are very limited
- Only Exception reporting is needed
- Java is not allowed on the servers

The traditional operating system agents (the knt, klz, and kux agents that monitor the Windows, Linux, and UNIX operating environments) cannot be used directly.

Which statement is true in order to meet the customer's requirements?

- A. IBM Tivoli Monitoring (ITM) will not be the right solution because of the relatively large agent footprint.
- B. ITM will not be the right solution because Java is required for all ITM agents to operate.
- C. The traditional ITM operating system agents must be configured for Autonomous Mode.
- D. The customer will have to deploy the System Monitor Agents which provide autonomous-only monitoring for their operating systems.

Answer: D

NO.10 How many agents can share the base listening port (1918) on a single network interface if EPHEMERAL=Y is not specified?

- A. There is no limitation.
- B. Only 1 agent can use this port.
- C. Only 16 agents can use this port.
- D. Only 32 agents can use this port.

Answer: C

NO.11 A Tivoli Enterprise Portal Server (TEPS) is running on the server portal01. Users are unable to connect to the TEPS server with the Java Web Start Client and the error message says: KFWITM009I The Tivoli Enterprise Portal Server is still being initialized and is not ready for communications.

Which log file contains additional details?

- A. <ITM HOME>/logs/portal01_hd_4*.log
- B. <ITM HOME>/logs/portal01_cq_4*.log
- C. <ITM HOME>/logs/portal01_ms_4*.log
- D. <ITM HOME>/logs/portal01_cms_4*.log

Answer: B

NO.12 What is a requirement for a customized workspace to be available to all Tivoli Enterprise Portal users?

- A. The workspace must be saved in read-only mode.
- B. The workspace must be saved as part of a custom navigator.
- C. The workspace must be saved as part of the physical navigator.
- D. The workspace must be saved while in Workspace Administration mode.

Answer: D
